Subject HPV - Notification of Support

This is to update you on Rhodia Inc.'s commitment to support CAS 25586-42-9, tritoyl phosphite in the U.S. HPV initiative. Rhodia has previously committed to support the chemical but, until now, had not reported progress to EPA about that support.

I am pleased to inform you that tritoyl phosphite has been accepted into the consortium called the Phosphite Manufacturers Consortium, and will be added to the category of chemicals being supported as a group. The Consortium administrator, Bob Fensterheim, is copied on this message and can confirm this for you, too. The Consortium is currently editing the category justification, preparing robust summaries for existing studies on tritoyl phosphite and determining if any changes to the Test Plan are warranted based on the expansion of the category and possible addition to the existing study database. The consortium will make a submission with the revised documents as soon as possible.

I remain Rhodia Inc.'s representative on to the HPV initiative. If I need to notify anyone else about this, please let me know.

Sincerely,

Glenn S. Simon, PH.D., DABT

Director of Toxicology
